I'm sure that you already **5** [retweet](#) know how awesome

[Android](#) OS is, but you'll have to agree that Android wouldn't be the same without its apps.

This time there is a new [application](#) for Android and it is called Skyfire 2.0.

0 is a [browser](#) and it's supposed to be a replacement for native Android browser. So what's so out this browser? Unlike its competitors this browser has its SkyBar with 3 options that other are missing, such as Video, Explore and Share. The SkyBar is positioned at the bottom of your it's quick and fast to access.

Let's have a closer look at the SkyBar. The first option, Video is used to play all the flash videos that your native Android browser couldn't. It might not work with all the videos, but it a nice feature, so you'll be able to view all the videos that you need fullscreen. Second option, Explore is used for finding [more information about](#) a certain topic, and all you have to do is to press the explore button and you'll find all relative information. As for the Share option it is used to share whatever you're browsing on other social websites.

Besides the amazing SkyBar Skyfire 2.0 has a lot more nice options such as possibility to open up to 8 different tabs and to choose how will you view your pages. So bottom line is, if you have Android phone, be sure to get this app, because it's simply
