

SwipeUSA Celebrates Six Years Of Revolutionizing The Banking Experience

Firm processed over \$250 million in ATM transactions; expands throughout the West

SAN FRANCISCO - Dec. 21, 2005 - SwipeUSA, a leading Bay Area ATM management firm, is celebrating its sixth year of operation. The San Francisco-based company provides full service ATMs at consumer accessible locations like the Sony Metreon, Burger King, Mel's Diners and Planet Juice franchises across the nation. SwipeUSA has experienced tremendous growth since its launch in 1999, increasing revenue 20 percent annually.

Established to provide retail businesses a better way to produce ongoing income and profits, SwipeUSA ATMs have dispensed more than \$250 million in cash to date. In 2004, SWIPE acquired a Bay Area ATM management firm, which added 80 machines and additional revenue to its portfolio.

Over the past year the company successfully lobbied the California Legislature to collect ATM surcharges from foreign bank accounts, and expanded its network beyond San Francisco to southern California and Nevada.

"We're excited about the future of the company as we extend our brand nationally and offer new automated financial services that will revolutionize the banking experience," said SwipeUSA co-founder and managing member Molly McClarrinon. "Because of our success, we're not only able to grow the company and expand our services, but also give back to the communities that have contributed to this success."

In 2006, the company will launch its Swipe Gives Back program, which will support charities that focus on financial management education, music education, entrepreneurship, hunger and domestic violence. Interested organizations based in California or Nevada should contact swipegivesback@swipeusa.com.
